

PROJECT PROFILE

Key Project Elements

- Concept plan
- Site and utility design
- Construction drawings
- Contract bidding
- Construction administration

Owner

City of St. Augustine

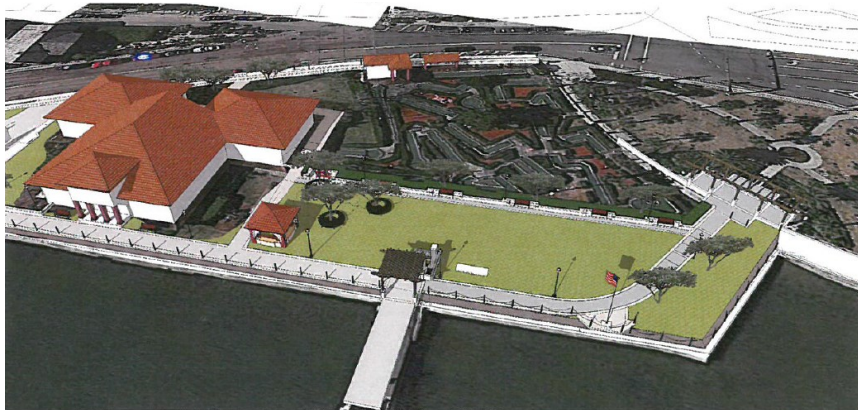

MDG's Role

Prime engineering consultant

Status

In process

BAYFRONT PARK ST. JOHNS COUNTY, FLORIDA

Architect's rendering of Bayfront Park after completion

Matthews Design Group (MDG) is currently working with the City of St. Augustine to improve Bayfront Park, located just down the water from Castillo de San Marcos, adjoining the St. Augustine Municipal Marina near the heart of historic downtown St. Augustine. This prime site allows for access either by land or by water.

Collaborating with subconsultants, MDG has prepared a concept design of the site which highlights the best features of the space, intermingling sunlight, shade, and grand views of the waterfront. The park will also feature a kiosk concession stand and modern amenities for park visitors' comfort and convenience. In addition to the concept plan, MDG is also responsible for creating construction plans, administering contract bids, and overseeing all phases of construction as needed, ensuring accuracy and quality throughout the entire process.
