In progress

Julington Creek Plantation

Matthews Design Group (MDG) has a Master Service Agreement to provide engineering services to the Julington Creek Plantation Property Owners Association (POA). The scope of this work includes drainage investigations, evaluation of roadway pavement, review of stormwater pond conditions, infrastructure inventory, design of concrete curbing, improvements to intersections, traffic study evaluations, and a general condition assessment. Duties also include permitting with the St. Johns County Development Review and St. Johns River Water Management District (SJRWMD) as needed.
