» MDG's Role

Engineering subconsultant to
Schenkel Schultz Architects

» Status

Completed 2011

» Contract Amount

\$20,000

The two-story, 16-classroom addition to the school complex opened for the 2011 – 2012 school year.

Matthews Design Group (MDG) completed engineering and site design for a new two-story classroom building expansion for this elementary school in St. Johns County. MDG worked through the project architect, Schenkel Shultz Architects, and the St. Johns County School District Engineering Department to assure construction met original design specifications. Project scope included site design and stormwater management for a 15,000-square-foot building and two-acre playground area located on a relatively congested existing site.
